Nuclear Engineering and Design

Contents of Volume 162

CONTENTS OF ISSUE 162(1)

Extended and Updated Selected Papers from SMiRT-12, Division L

Guest Editor: J.-P. Boehler

Preface ix

Energy balance of thermoelastic martensite transformation under stress
A. Chrysochoos, H. Pham and O. Maisonneuve 1

High temperature creep and cyclic deformation behaviour of AISI 316 L(N) austenitic steel and its modelling with unified constitutive equations
A. Haupt, D. Munz, W. Scheibe, B. Schinke, R. Schmitt and V. Sklenicka 13

Behaviour and modelization of a 17–12 SPH stainless steel under cyclic, unidirectional and bidirectional anisothermal loadings
A. Bouchou and P. Delobelle 21

Determination of strain components in low-cycle multiaxial fatigue tests on tubes
B. Windelband, B. Schinke and D. Munz 47

Basic conditions for material and structural ratcheting
H. Hübel 55

The application of a kinematic hardening model for assessing ratchetting in pressurized pipes
R.J. Rider, S.J. Harvey and I.D. Charles 67

On plastic deformation and fatigue under multiaxial loading
C.H. Wang and M.W. Brown 75

Study on metallographic damage parameter in creep-damage-dominant condition under creep–fatigue loading
F. Ueno, K. Aoto and Y. Wada 85

Creep–fatigue damage assessment by subsequent fatigue straining
M. Yaguchi, T. Nakamura, A. Ishikawa and Y. Asada 97

On the necessity of taking into account the variation in the Young modulus with plastic strain in elastic–plastic software
F. Morestin and M. Boivin 107

Empirical investigation on buckling and post-buckling behaviour of cell liners
K. Takiguchi and H. Hotta 117

Announcement 125

Instructions to Contributors 127

CONTENTS OF ISSUE 162(2–3)

Reactor Engineering

Editorial to article by J.C. Lefèvre 131

European fast reactor design
J.C. Lefèvre, C.H. Mitchell and G. Hubert 133

Engineering Mechanics

Constraint effects on fracture toughness of impact-loaded, precracked Charpy specimens
K.C. Koppenhoefer and R.H. Dodds, Jr. 145

Fuel Engineering

Advanced mixed oxide fuel assemblies with higher plutonium contents for pressurized water reactors
F. Burtak, L. Hetzelt and W. Stach 159

Materials Engineering

Studies of IGA intergranular attack/stress corrosion cracking related parameters and remedies
A. Stutzmann and F. Nordmann 167

Thermal-Hydraulics, Safety and Risk Analysis

Insights and comparisons of the level-2 results of recent probabilistic safety analyses
M. Khatib-Rahbar, A.S. Kuritzky, R. Vijaykumar, E.G. Cazzoli, U. Schmocker and W. Werner 175

Accident analysis of lead or lead–bismuth cooled small safe long-life fast reactor using metallic or nitride fuel
S. Zaki and H. Sekimoto 205

Chaotic oscillations in a low pressure two-phase natural circulation loope under low power and high inlet subcooling conditions
C.Y. Wu, S.B. Wang and C. Pan 223

Periodic flow excursion in an open two-phase natural circulation loop
I.S. Kyung and S.Y. Lee 233

Prediction of the single-phase turbulent mixing rate between two parallel subchannels using a subchannel geometry factor
M. Sadatomi, A. Kawahara and Y. Sato 245

Materials chemistry and transport modelling for severe accident analyses in light-water reactors. III. Fuel dissolution by molten cladding
D.R. Olander 257

A two-phase level tracking method
B. Aktas and J.H. Mahaffy 271

Implementation of a non-condensable model in RELAP5/MOD3
Y.A. Hassan and S. Banerjee 281

Theoretical basis for the Uchida correlation for condensation in reactor containments
P.F. Peterson 301

An analytical study on excitation of nuclear-coupled thermal hydraulic instability due to seismically induced resonance in BWR
M. Hirano and T. Tamakoshi 307

Analysis of transient heat conduction with phase changes by a boundary integral equation method
T. Goto and M. Suzuki 317

Technical Engineering Note

Investigations concerning the mechanical load on waste packages in vertical repository boreholes
W. Feuser, E. Barnert, H. Vijgen and H. Wetzler 325
